

A scatter plot showing the word counts for two news channels, India Today (red dots) and NDTV (blue dots). The x-axis represents word counts, ranging from 0 to 14,000. The y-axis represents another variable, ranging from 0 to 14,000. A dashed red line indicates the mean word count for India Today, and a dashed blue line indicates the mean word count for NDTV. The plot shows that NDTV generally has higher word counts than India Today, with a higher mean and a wider distribution.
